

PAULIUS ASTRAUSKAS

Front-End Developer

// 01. About me

I am Paulius, a dedicated front-end developer with over 3 years of experience specializing in React web development. Throughout my career, I have honed my skills in creating dynamic and responsive web applications, ensuring a seamless user experience. Additionally, I have minimal but valuable experience in back-end development with Java. I am highly adaptable and thrive in both team-oriented and individual work environments, consistently delivering high-quality results and meeting project deadlines. My passion for continuous learning and improvement drives me to stay updated with the latest industry trends and technologies.

// 03. Experience

COINGATE (2022-08 / 2024-04)

Front-End Developer

I managed the homepage content, supported the invoicing process, and worked on a new dashboard project. My role involved a lot of multitasking and attention to detail to ensure everything ran smoothly.

NextJS . Typescript . Tailwind

EIS (2021-04 / 2022-08)

Front-End Developer

Developed high level insuretech web application, wrote snapshot tests, had responsibilities to make new application version releases and had an opportunity to try out full-stack developer position.

REACTJS . MobX . Typescript . SCSS

// 04. Education

VTMC/AKADEMIJAIT (2021 / 2022)

JAVA Developer

I took JAVA courses at VTMC, and due to good entrance test results, I was transferred to Akademija.IT. At Akademija.IT, we were taught at a higher level and a more intense pace. We learned various skills, including: Operating system management (Linux), HTML, CSS, JavaScript, and JAVA, Designing and maintaining databases, technologies such as React and Spring Boot. At the end, we had a group project where we built a full-stack working web application. We used JAVA and JavaScript languages, an H2 database, React and Spring Boot technologies, and the Agile methodology.
